

The 4thJapan-China Energy and Environment Forum

“The 4th Japan-China Energy and Environment Forum” was held on Nov.8th, 2009 at the Great Hall of the People in Beijing. JCIA attended the Chemical session meeting to contribute to strengthen the cooperative relation between Japan and China.

Following the last Forum held in Japan, about 1,000 people from Japan and China participated in “The 4th China-Japan Energy and Environment Forum”.

Li Ke Qiang, Chinese Vice - Premier, made an opening speech, followed by the key note address by Mr.Masayuki Naoshima, minister of economy, trade and industry of Japan and Xie Zhen Hua, Vice Chairman of National Development and Reform Commission.

Seven session meetings including “Chemical”, “Leading runner policy”, “Circular Economy” session were held in the afternoon. In the Chemical session meeting, Japan made presentation on the Energy Saving Technology, the Chemicals Control, the Global Warming Countermeasures etc. and active exchange of views were carried out among all the participants.

In advance of the Forum in Beijing, Exchange by both Japan and China Chemical•Gas group was held on Nov.6th in Chong Qing Chemical Industry Park in which Japan explained about “the Compendium-Technologies on Energy Saving and Environment by JCIA” and Chong Qing explained about the Park.
